

THE CREATOR'S STUDIO

Quick-Start Guide

Your content business, organised and ready to build.

Mirembé Muse — Where Transformation Has a Template

Welcome to Your Studio

Nobody handed you a platform. Nobody gave you a head start. You picked up your phone, pointed it at your life, and decided that what you had to say was worth saying out loud.

That took courage. And it still takes courage every single time you post, every time you pitch, every time you decide to keep going when the algorithm does not cooperate and the numbers do not reflect the effort.

The Creator's Studio was built for this exact season — the building season. Before the brand deals. Before the millions of followers. Before the world catches up to what you already know about yourself.

Inside this workspace you will find the systems that professional creators use to stay consistent, grow intentionally, and monetise with dignity. You are not just a creator. You are a media company. A brand. A movement in the making.

The world needs your voice. This tool helps you sustain it.

What's Inside Your Studio

-  **Content Projects** — every piece of content from idea to published, in one place
-  **Content Batch Tracker** — plan, shoot, and log your batch production days
-  **Brand Partnerships** — manage every brand deal from first email to final payment
-  **Analytics Tracker** — monthly platform performance, growth, and revenue by channel
-  **Idea Bank** — capture, develop, and prioritise every content idea before it disappears
-  **Creative Habits** — track the daily and weekly habits that sustain your creative output

Before You Begin

You'll need the following to get started:

- A free or paid Notion account (notion.so)
- The template link from your Mirembé Muse purchase confirmation email
- 15–30 minutes of uninterrupted time for setup
- A list of your active platforms, recent content ideas, and any brand partnerships in progress

⚡ **PRO TIP — BEST ON DESKTOP FIRST** Set up your studio on a desktop or laptop before switching to mobile. Notion's mobile app works beautifully once configured, but first-time setup is much smoother on a larger screen.

YOUR NOTION LINK: https://shard-purchase-279.notion.site/THE-CREATOR-S-STUDIO-2f51f72e5a63805ca573ec90016fdabb?source=copy_link

Getting Started — Step by Step

1. **Duplicate the template into your Notion workspace** Click the link in your confirmation email.

https://shard-purchase-279.notion.site/THE-CREATOR-S-STUDIO-2f51f72e5a63805ca573ec90016fdabb?source=copy_link

In Notion, click 'Duplicate' in the top right corner. Choose your workspace. All 6 databases will be copied into your account instantly.

2. **Read the Welcome page first** Open 'Welcome — READ THIS FIRST' inside the template. It's a short message from the founder written specifically for African creators building in the early stages. Don't skip it.
3. **Update your dashboard header** On the main Studio page, update the 'This Week' section with the number of content pieces published and your current revenue. This is your weekly snapshot — keep it live.

4. Add your first content pieces Open Content Projects. Click '+ New' for each piece of content you are currently working on or planning. Fill in the Title, Platform, Type, Pillar, Status, and Due Date. This is your primary content calendar.

5. Set up your Idea Bank Open Idea Bank. Add every content idea you currently have in your notes app, voice memos, or head. Give each idea a Platform, Content Type, Pillar, and Priority. Empty your mind into this database — nothing should live only in your head.

6. Log any active brand partnerships Open Brand Partnerships. If you have any current or pending brand deals, add them now. Fill in the Brand, Status, Deliverables, Content Due Date, and Contract Value. This database is your money tracker for creator income.

7. Set up your Analytics Tracker Open Analytics Tracker. Create an entry for each platform you post on (Instagram, TikTok, YouTube, LinkedIn, etc.). Add your current follower counts and last month's key stats. You will update this monthly going forward.

8. Log your first Content Batch Open Content Batch Tracker. After your next batch day, create an entry with the Batch Date, Pieces Completed, Platforms Covered, Equipment Used, and Energy Level. This becomes your production log.

9. Set your Creative Habits Open Creative Habits. Review the habits already loaded in the template. Adjust them to match your actual creative routine — keep what fits, modify what doesn't. Tick off each habit as you complete it each week.

10. Bookmark your Studio Pin the main Creator's Studio page in your Notion sidebar. This is your creative home base — open it first thing every creation day.

Your 6 Modules – What Each One Does

Content Projects

Every content piece from idea to published – your live content calendar

Key fields: Title, Platform, Type, Status, Due Date, Published Date, Topic/Theme, Pillar, Hook, Caption, CTA, Tags, Collaborators, Assets Needed, Collab?, Monetised?, Revenue, Views/Reach, Engagement Rate (%), Performance, Notes

Content Batch Tracker

Plan and log every batch production day – your creative production record

Key fields: Batch Name, Batch Date, Batch Start Time, Batch End Time, Theme, Status, Total Pieces Planned, Pieces Completed, Pieces Uploaded, Content Types in Batch, Platforms Covered, Equipment Used, Location/Setup, Outfits Shot, Hooks Written, Captions Written, Thumbnails Made, Total Hours, Energy Level (1–5), Scheduling Tool, Scheduled?, Would Repeat Setup?, Notes & Blockers

Brand Partnerships

Every brand deal tracked from first contact to payment received

Key fields: Brand, Contact Person, Contact Email, Contact WhatsApp, Industry, Partnership Type, Status, Platform, Deliverables, Content Due Date, Content Published Date, Content Link, Fee Offered (R), Fee Negotiated (R), Fee Accepted (R), Gifting Value (R), Contract Value, Contract Signed?, Invoice Number, Invoice Sent?, Payment Amount (R), Payment Date, Payment Received?, Payment Terms, Exclusivity, Exclusivity Period, Usage Rights, Performance Metrics Required, Post-Campaign Report Sent?, Rating (1–5), Notes

Analytics Tracker

Monthly platform performance – growth, reach, and revenue by channel

Key fields: Name, Platform, Month, Date, Followers Start, Followers End, Net Growth, Growth %, New Followers from Top Post, Total Posts, Total Reels/Videos, Total Reach, Total Impressions, Average Views Per Reel, Average Engagement Rate (%), Likes (month total), Comments (month total), Saves (month total), Shares (month total), Link Clicks, Bio Link Clicks, Profile Visits, Top Performing Post, Top Post Views, Top Post Engagement Rate (%), Revenue from Platform (R), Revenue, Top Content, Notes

Idea Bank

Capture and develop every content idea – nothing lost, everything ready

Key fields: Idea, Platform, Content Type, Pillar, Priority, Status, Trend Status, Date Captured, Target Date, Hook (Draft), Angle / Unique Take, Affirmation Tie-In, Inspiration Source, Inspiration Link, Format Notes, Tags, Collab Potential, Monetisation Potential, Linked Project, Research Needed?, Resources Needed, Notes, Captured

Creative Habits

Track the daily and weekly practices that keep your creativity sustainable

Key fields: Habit, Category, Frequency, Time of Day, Duration (mins), Target, Current Streak, Longest Streak, Completion Rate (%), Linked Affirmation, Why This Habit, Notes & Reflections, Weekly completion columns (Week of...)

Customising Your Studio

Changing Platform Options

Click any Platform tag and select 'Edit option' to add or rename platforms. Add Facebook, Pinterest, X, Substack, or any platform you use that isn't already listed.

Adding New Content Pillars

Your content pillars are the recurring themes that define your brand voice. Customise the Pillar field in Content Projects to match your actual pillars – for example: Education, Lifestyle, Business, Behind the Scenes, Community, Humour.

Creating Custom Views

Each database supports Table, Board (Kanban), Calendar, Gallery, and Timeline views. Create a Calendar view of Content Projects to see your posting schedule visually. Create a Board view of Idea Bank grouped by Status to see what's ready to create at a glance.

Filtering for Focus

Use the Filter button to narrow any database to what matters right now – 'Content pieces due this week', 'Brand partnerships with payment outstanding', 'Ideas with status Ready to Create and priority High'.

Your Daily & Weekly Workflow

When	Action
Each morning	Open Creative Habits. Tick off what you complete. Check Content Projects for anything due today.
When an idea hits	Open Idea Bank immediately. Add the Idea, Platform, Hook draft, and Priority. Do not let it live only in your head.
On batch day	Create a new Content Batch Tracker entry before you start. Log your planned pieces, setup, and theme. Complete the entry after shooting.
When content is published	Update the Status in Content Projects to Published. Add the Published Date, Views/Reach, and Revenue if monetised.
When a brand contacts you	Create a new Brand Partnerships entry immediately. Log the Brand, Fee Offered, Deliverables, and Status = In Negotiation.
Monthly (1st of month)	Create a new Analytics Tracker entry for each platform. Log last month's stats. Review growth patterns and top performing content.
Weekly (Sunday)	Review Content Projects for the coming week. Plan your next batch day. Update Creative Habits completion.

Tips for Getting the Most Out of Your Studio

- Write your Hook in Content Projects before you shoot, not after. The hook is the most important part of any piece — having it written forces clarity about what the content is actually about.
- Use the Idea Bank as your first stop, not your notes app. Ideas captured in the system are linked, searchable, and ready to schedule. Ideas in your notes app get buried.
- The Brand Partnerships database is your negotiation memory. Always log the Fee Offered alongside the Fee Negotiated — over time this shows you exactly how much money you leave on the table by not negotiating.
- Log your Energy Level (1–5) on every Content Batch Tracker entry. After a few months you will know which conditions produce your best content — and you will stop scheduling batch days on your worst energy days.
- The Affirmation Tie-In field in Idea Bank and Creative Habits is not decoration. Your content is rooted in your values and your voice. Knowing which affirmation connects to which content helps you create from a grounded, authentic place.
- Update Analytics Tracker on the same day every month. Consistency in when you log makes the data comparable. The first of the month works well.
- Use the Post-Campaign Report Sent? field in Brand Partnerships. Sending a post-campaign report is the fastest way to secure repeat brand deals and to justify higher rates next time.

A Note from Nanda

"You are not just a creator. You are a media company. A brand. A movement in the making.

The building season is the hardest one — before the recognition catches up to the effort. But it is also the most important one. Because what you build now determines what can scale later.

This system keeps your ideas from dying in voice memos. It keeps your money from getting lost in DMs. It keeps your creative energy from burning out before the world sees what you are capable of.

Stay consistent. Pitch boldly. Rest without guilt.

The world needs your voice. I built this so you can sustain it."
