

HIGH SCHOOL ACADEMIC EXCELLENCE ENGINE

Quick-Start Guide

Your Matric command center — set up in under 30 minutes.

Mirembé Muse — Where Transformation Has a Template

Welcome to Your Academic Command Center

To the high school student carrying the weight of everyone's expectations — breathe for a second.

You are doing something incredibly hard. Preparing for Matric is not just exams. It is the pressure of your parents' dreams, your teachers' expectations, your own fear of what happens if you don't make it. Most people forget to tell you that.

But here is what is also true: you are still here. Still trying. Still showing up.

This planner was built to take the chaos out of your final year and replace it with clarity. Subject trackers. Exam countdowns. Study session planners. Space to breathe, organise, and actually perform at the level you are capable of — not the level that anxiety allows.

You are not just studying for a certificate. You are studying for the version of yourself that walks into a university, a career, a life of your own choosing.

That version of you deserves every possible advantage. Let's get you set up.

What's Inside Your Engine

-  **My Subjects** — all your subjects, marks, teachers, and study hours
-  **Assignments & Tasks** — every deadline and test, tracked and prioritised
-  **Study Sessions** — log every session, method, and reflection
-  **Exam Prep Tracker** — countdowns, weak areas, and prep status for every exam
-  **Term Goals & Progress** — set targets, track action steps, measure growth
-  **Wellness Check-Ins** — your mental state is part of your academic strategy
-  **Weekly Detailed Schedule** — your full week, time-blocked and structured

Before You Begin

You'll need the following to get started:

- A free or paid Notion account (notion.so)
- The template link from your Mirembé Muse purchase confirmation email
- 15–30 minutes of uninterrupted time to set up
- Your school timetable, subject list, and any upcoming test or assignment dates

⚡ **PRO TIP — BEST ON DESKTOP FIRST** Set up your engine on a desktop or laptop before using it on your phone. Notion's mobile app works well once configured, but first-time setup is much easier on a bigger screen.

YOUR NOTION LINK: https://shard-purchase-279.notion.site/HIGH-SCHOOL-ACADEMIC-EXCELLENCE-ENGINE-2f11f72e5a638042bcb5e169eafc4de0?source=copy_link

Getting Started — Step by Step

1. **Duplicate the template into your Notion workspace** Click the link in your confirmation email.

https://shard-purchase-279.notion.site/HIGH-SCHOOL-ACADEMIC-EXCELLENCE-ENGINE-2f11f72e5a638042bcb5e169eafc4de0?source=copy_link

In Notion, click 'Duplicate' in the top right corner. Choose your workspace. All 7 databases will be copied into your account.

2. **Read the Welcome page first** Open 'Welcome — READ THIS FIRST' inside the template. It's a short message written directly for Matric students from the founder. Read it before you do anything else.

3. **Personalise your header** At the top of the main page, replace '[Student Name]', '[X]' for Grade, and 'Term [X]' with your actual name, grade, and current term. Making it yours matters.

4. Add your subjects Open My Subjects. Click '+ New' for each subject you're taking. Fill in the Subject Name, Type (Compulsory/Elective), Teacher Name, Class Times, Term, Difficulty Level, and your Target Mark %. Add all 7 subjects — this database anchors everything else.

5. Load all your assignments and tests Open Assignments & Tasks. Add every upcoming assignment, test, practical, or submission. Link it to the relevant subject, mark the due date, weight %, and priority. Don't filter — put everything in now so nothing is forgotten.

6. Log your first study session After your next study block, open Study Sessions. Add the time, subject, method, and a short note on what you covered. This builds a study history that helps you see where your effort is going.

7. Set up your upcoming exams Open Exam Prep Tracker. Add each upcoming test or exam. Fill in the date, format, venue, and your weak areas. Set a study start date. The earlier you load this, the more the system can help you prepare.

8. Set your Term Goals Open Term Goals & Progress. Add at least one academic goal for this term — make it specific. Not 'do better in Maths' but 'achieve 75% in Mathematics by end of Term 2.' Add the action steps that will get you there.

9. Do your first Wellness Check-In Open Wellness Check-Ins and log today. Rate your stress, sleep, and energy. Write one thing that went well. This is not optional — how you feel affects how you perform, and tracking it helps you spot patterns before they become problems.

10. Block out your Weekly Schedule Open Weekly Detailed Schedule. Time-block your school hours, study sessions, sport or activities, and rest. Seeing your week clearly is one of the most calming things you can do during a stressful term.

Your 7 Modules — What Each One Does

My Subjects

Your complete subject tracker — marks, effort, teacher, and status

Key fields: Subject Name, Subject Type, Teacher Name, Class Times, Term, Grade Level, Current Mark %, Target Mark %, Term Average, Assessment Weight, Difficulty Level, Study Hours/Week, Status, Notes

Assignments & Tasks

Every test, assignment, and deadline — visible, prioritised, nothing missed

Key fields: Task Name, Subject, Type, Due Date, Priority, Weight, Status, Estimated Hours, Actual Hours, Mark Received, Checklist, Notes

Study Sessions

Log every session — method, focus, what you learned, and what confused you

Key fields: Session Name, Date, Subject, Study Method, Type, Focus Area, Topics Covered, What I Learned, Questions/Confusion, Duration (min), Energy Level Before, Energy Level After, Location, Completed, Notes

Exam Prep Tracker

Track every test from study start to results — no surprises

Key fields: Exam Name, Subject, Exam Type, Date, Days Until, Time, Venue, Format, Total Marks, Term Weight, Target Mark %, Confidence Level, Prep Status, Study Start Date, Target Hours, Practice Hours, Past Papers Done, Topics to Cover, Topics Mastered, Weak Areas, Actual Mark %, What Went Well, What to Improve, Notes

Term Goals & Progress

Set intentions for the term and track every step toward them

Key fields: Goal, Goal Description, Term, Category, Subject, Priority, Status, Progress %, Action Steps, Obstacles, Success Metric, Support Needed, Target Date, Reflection Notes

Wellness Check-Ins

Because you cannot pour from an empty cup — track how you're really doing

Key fields: How I'm Feeling, Check-in Date, Stress Level, Sleep Quality, Hours Slept, Energy Level, Mental Clarity, Motivation Level, Physical Health, Did I Ask For Help?, Challenges Faced, Self-Care Activities, What Went Well Today, Gratitude Note, Need Support With, Tomorrow's Intention

Weekly Detailed Schedule

Your full week, structured and visible

Key fields: Time Block, Day, Activity, Subject/Category, Location, Notes

Customising Your Engine

Changing Status Labels

Click any status tag (like  URGENT or  Not Started) and select 'Edit option' to rename or recolour it. Adjust language to match your school's terminology.

Adding New Fields

- Every database can have new properties added. Click the '+' at the end of any database header row. Choose from text, number, date, checkbox, select, and more.

Creating Custom Views

Each database supports Table, Board (Kanban), Calendar, Gallery, and Timeline views. Click '+ Add a view' at the top of any database. A Calendar view for Assignments or a Board view for Exam Prep status works especially well.

Filtering and Sorting

Use Filter to show only what matters right now — 'Tests due this week', 'Subjects with Needs Attention status', or 'Study sessions this month'. Use Sort to prioritise by due date, mark weight, or difficulty.

Your Daily Workflow

Time	Action
Morning	Open Assignments & Tasks. Filter by 'Due This Week'. Know your plate before school starts.
Before studying	Open Study Sessions. Create a new entry with your subject, planned time, and method. Set your intention for the session.
After studying	Complete the Study Session entry. Log what you covered, what confused you, and how your energy was.
When a test is returned	Update the task in Assignments & Tasks with your Mark Received. Note what you'd do differently.
Before bed	Add a Wellness Check-In. Rate your day. Write tomorrow's intention. Keep it short.
Weekly (Sunday)	Review your upcoming deadlines. Update Exam Prep Tracker. Check your Term Goals progress. Set your schedule for the week ahead.

Tips for Getting the Most Out of Your Engine

- Link everything. When you log a Study Session, link it to a Subject. When you add a Task, link it to a Subject. The connections are what make the whole system work.
- Fill in your Weak Areas in Exam Prep Tracker as soon as you know them — not the night before the test. That's when this system saves your mark.
- Use the 'Questions/Confusion' field in Study Sessions honestly. These notes become your revision list when exam season arrives.
- Keep your Current Mark % updated in My Subjects every time you get a result back. Watching the gap between current and target shrink is incredibly motivating.
- Don't only log Wellness Check-Ins on hard days. Good days matter too — they show you what conditions help you perform at your best.
- Use the Term Weight field in Assignments to prioritise ruthlessly. A 30% assignment deserves more hours than a 5% homework submission.
- Keep the Notes field in every database updated. Your past self is your best study partner.

A Note from Nanda

*"To the high school student carrying the weight of everyone's expectations —
You are doing something incredibly hard. And most people forget to tell you that.
This system was built so that you can stop holding everything in your head and start
putting your energy where it matters: into actually learning.
When exam season feels impossible, open this. Look at your study hours logged, your
goals set, your sessions completed.
You have been building. You are more ready than you think.
Study smart. Rest well. Show up."*
