

VARSITY ACADEMIC EXCELLENCE ENGINE

Quick-Start Guide

Your academic brain, organised and ready to work.

Mirembé Muse — Where Transformation Has a Template

Welcome to Your Academic Command Center

You made it to university. That is not small. For many of us, that acceptance letter meant everything — to a family, a community, a lineage.

Now the real work begins. And nobody prepared you for this part.

Nobody told you how to manage NSFAS deadlines while keeping up with assignments. Nobody showed you how to organise five modules, a part-time job, and a mental health crisis all at once. Nobody gave you a system. They just expected you to figure it out.

This planner was built from the inside — by someone who was that student. It is not about pressure. It is about power. The power of knowing exactly what is due, what is done, and what you need to do next.

You belong here. Now let's get you set up.

What's Inside Your Engine

-  **My Subjects** — your full module database, marks, and study hours
-  **Assignments & Tasks** — every deadline, tracked and prioritised
-  **Study Sessions** — log and reflect on every session you put in
-  **Exam Prep Tracker** — from study start to exam day, nothing left to chance
-  **Term Goals & Progress** — set intentions, track growth, stay on course
-  **Wellness Check-Ins** — because your mind is part of your grade
-  **Detailed Weekly Schedule** — your full week, time-blocked and structured

Before You Begin

You'll need the following to get started:

- A free or paid Notion account (notion.so)
- The template link from your Mirembé Muse purchase confirmation email
- 15–30 minutes of uninterrupted time for setup
- Your timetable, module list, and any upcoming assignment or exam dates

⚡ PRO TIP — BEST ON DESKTOP FIRST Set up your engine on a desktop or laptop before switching to mobile. Notion's mobile app works beautifully once configured, but initial setup is much smoother on a larger screen.

YOUR NOTION LINK: https://shard-purchase-279.notion.site/VARSITY-ACADEMIC-EXCELLENCE-ENGINE-4d61f72e5a638387b8b4011d1dcefa2?source=copy_link

Getting Started — Step by Step

- 1. Duplicate the template into your Notion workspace** Click the link in your confirmation email.
https://shard-purchase-279.notion.site/VARSITY-ACADEMIC-EXCELLENCE-ENGINE-4d61f72e5a638387b8b4011d1dcefa2?source=copy_link

In Notion, click 'Duplicate' in the top right corner. Choose your workspace. All 7 databases will be copied into your account instantly.

- 2. Read the Welcome page first** Open 'Welcome — READ THIS FIRST' inside the template. It's a short message from the founder written specifically for first-gen and under-resourced students. Don't skip it.
- 3. Personalise your header** At the top of the main page, replace '[Student Name]', '[X]' for Year, and 'Semester [X]' with your actual details. This makes the system feel like yours from the start.

4. Add your subjects Open My Subjects. Click '+ New' for each module you're registered for. Fill in the Subject Name, Code, Lecturer, Lecture Times, Semester, Credits, and your Target Mark %. This database anchors everything else.

5. Load your assignments Open Assignments & Tasks. Add every assignment, test, or submission you have coming up. Link each one to the relevant subject, set a due date, and mark its priority. Don't filter — add everything so nothing falls through.

6. Log your first study session Open Study Sessions after your next study block. Add the time, subject, method, and a quick note on what you learned. This builds your study history and helps you spot patterns in your focus and energy.

7. Set up your upcoming exams Open Exam Prep Tracker. Add each exam with its date, format, venue, and target mark. Set a study start date and log your weak areas now, before the pressure hits.

8. Set your Term Goals Open Term Goals & Progress. Add at least one academic goal and one personal goal for the term. Be specific — not 'do better' but 'achieve 75% in Financial Accounting by June.' Then add the action steps that will get you there.

9. Do your first Wellness Check-In Open Wellness Check-Ins and add today's entry. Rate your stress, sleep, and energy. Note one thing that went well. This is not optional — your mental health is part of your academic strategy.

10. Block out your weekly schedule Open Detailed Weekly Schedule. Time-block your lectures, study sessions, rest, and personal commitments. Seeing your week on a page removes the anxiety of not knowing what's next.

Your 7 Modules — What Each One Does

My Subjects

Your complete module database — marks, effort, and status at a glance

Key fields: Subject Name, Subject Code, Lecturer, Lecture Times, Semester, Credits, Current Mark %, Target Mark %, Difficulty Level, Study Hours/Week, Status, Notes

Assignments & Tasks

Every deadline in one place — nothing due catches you off guard

Key fields: Task Name, Subject, Type, Due Date, Weight %, Priority, Status, Estimated Hours, Actual Hours, Mark Received, Notes

Study Sessions

Log every session — time, method, focus, and reflection

Key fields: Session Time, Date, Subject, Study Method, Focus Level, Topics Covered, What I Learned, Questions/Confusion, Duration (min), Energy Level Before, Energy Level After, Location, Type, Completed

Exam Prep Tracker

From first revision to exam day — structured and stress-free

Key fields: Exam Name, Subject, Exam Date, Exam Time, Venue, Format, Prep Status, Days Until Exam, Target Mark %, Confidence Level, Study Start Date, Target Study Hours, Study Hours Logged, Topics to Cover, Topics Mastered, Weak Areas, Practice Tests Done, Practice Tests Completed, Notes

Term Goals & Progress

Set intentions, track action steps, measure your growth

Key fields: Goal, Goal Description, Semester, Category, Subject, Priority, Status, Progress %, Action Steps, Obstacles, Success Metric, Support Needed, Target Date, Reflection Notes

Wellness Check-Ins

Because how you feel directly affects how you perform

Key fields: Date, How I'm Feeling, Stress Level, Sleep Quality, Hours Slept, Energy Level, Mental Clarity, Motivation Level, Physical Health, What's Stressing Me, Did I Ask For Help?, Challenges Faced, Self-Care Activities, What Went Well Today, Gratitude Note, Need Support With, Tomorrow's Intention

Detailed Weekly Schedule

Your full week, time-blocked and ready

Key fields: Time Block, Day, Activity, Subject/Category, Location, Notes

Customising Your Engine

Changing Status Labels

Click any status tag (like  URGENT or  Not Started) and select 'Edit option' to rename or recolour it. Adjust the language to match your campus or faculty culture.

Adding New Fields

Every database can have new properties. Click the '+' at the end of any database header to add a field — text, number, date, checkbox, select, and more.

Creating Custom Views

Each database supports Table, Board (Kanban), Calendar, Gallery, and Timeline views. Click '+ Add a view' at the top of any database. Try a Calendar view for Assignments or a Board view for Exam Prep status.

Filtering and Sorting

Use Filter to show only what's relevant right now — e.g., 'Assignments due this week', 'Subjects with Struggling status', or 'Wellness check-ins from the last 7 days'. Use Sort to prioritise by due date, mark weight, or priority level.

Your Daily Workflow

Time	Action
Morning	Open Assignments & Tasks. Filter by 'Due This Week'. Know your plate before the day starts.
Before studying	Open Study Sessions. Create a new entry with your planned time, subject, and method. Set your intention.
After studying	Complete the Study Session entry. Log what you covered, what confused you, and your energy levels.
When an assignment is returned	Update the task in Assignments & Tasks with your Mark Received. Reflect in the Notes field.
Before bed	Add a Wellness Check-In. Rate your day honestly. Write tomorrow's intention.
Weekly (Sunday)	Review your upcoming deadlines, update your Exam Prep Tracker, check your Term Goals progress, and set your weekly schedule.

Tips for Getting the Most Out of Your Engine

- Link everything. When you add a Study Session, link it to a Subject. When you add an Assignment, link it to a Subject. Connections are what make the system powerful.
- Use the 'What I Learned' and 'Questions/Confusion' fields in Study Sessions honestly. These notes become your revision goldmine before exams.
- Fill in your Weak Areas in Exam Prep Tracker the moment you know them — not the week before the exam. That's when the system saves you.
- Set Target Study Hours for each exam and log your actual hours. Watching that number grow is one of the most motivating things you can do for yourself.
- Don't only do Wellness Check-Ins when you're struggling. Logging your good days is just as important — it shows you what conditions help you thrive.
- Update your Current Mark % in My Subjects every time you get a result back. Seeing the gap between current and target mark is a quiet, consistent motivator.
- Use the Notes field in every database. Future-you revising in exam season will thank present-you for writing it all down.

A Note from Nanda

"To the student who got here against the odds —

You made it to university. That is not small.

This system was built so you don't have to choose between staying organised and staying sane. You deserve both.

When exam season feels impossible, open this. Look at your study hours logged, your goals set, your sessions completed.

You have been building. You are ready.

Now go graduate."

— **Nandawula Regine Kabali-Kagwa, Founder, Mireembe Muse Digital**

3x Business Graduate, Nelson Mandela University

Support & Community

 **Technical Support** Email us with a screenshot and description of any issue. We won't rest until it's working perfectly for you.

 **Muse Collective Community** Join the community of African students, entrepreneurs, and creatives using Mireembe Muse systems to build extraordinary things.

 *Mireembe Muse — Where Transformation Has a Template*

Study with intention. Rest without guilt. Graduate with your name on it.
